

WHAT IS CLAIMED IS:

1        1. A method of controlling the communication of  
2        television programming at a television transmission station,  
3        said method comprising the steps of:  
4                receiving television programming from a plurality of  
5        television programming sources;  
6                receiving programming communication instructions  
7        designating for each unit of television programming at least  
8        one from the group consisting of:  
9                (a) an output channel to be used in communicating  
10        said unit of television programming; and  
11                (b) the time said unit of television programming is  
12        to be communicated; and  
13                communicating each unit of television programming from  
14        said transmission station to at least one subscriber according  
15        to said programming communication instructions.
